Session Title: PG Education 4 (Kidney Transplantation)

Date & Time, Place: April 27 (Thu), 10:30 - 12:00, Room 5

Perioperative management of the kidney transplant recipients

Jong Cheol Jeong

Seoul National University Bundang Hospital, Korea, Republic of

Medical management of perioperative periods of kidney transplantation need cautious monitoring and critical decision. In this lecture, I would like to introduce several case studies of different post-transplant complications including post-transplant uncontrolled hypertension, delayed graft function, transplant artery stenosis, urinary tract infection, hemorrhage, seroma, and wound dehiscence. Short review and evidence summary would be provided during the lecture. Questions and discussions from trainees are welcomed.
